What do i need else for my pc

Firstly you need a mouse,keyboard and a monitor to even use it.

Secondly you need for your mouse a mousepad for a better experience and this will help your mouse from scratches from the bottom.

(The next points are optional.)

Thirdly you need a gaming controller for a better grip and it's easier to play with (i would recommend a controller with hall effect).

Fourtly a good table and a good chair for relaxed use.

Lastly a webcam and a headset with microphone for playing with friends.

Thank you for reading.
